EDUCATION

BS Computer Science at NUST

2017 to 2021

National University of Science and Technology

Islamabad, Pakistan

- Studied: AI, Software Engineering, Software Testing Fundamentals, Software & API Performance Testing, Test Automation and Agile Software Testing.

EXPERIENCE

Software Quality Assurance Engineer

June 2022 to Present

Islamabad, Pakistan

I have worked globally, on business applications built around AI, SuiteCRM, Full Stack Custom Solutions, Web and Mobile Apps. I like to mention few which includes **TalkerCRM** (AI based voice interactive and chatbot driven responsive application), **Sigla Credit** (Financial System with extensive API integrations and system workflows), **Route Planner** and **Bizzotto CRM** (System loaded with Email and SMS Marketing Campaigns).

Functional and Regression Testing

- Validated User / Business requirements and features like Contacts, Accounts, Calls and AI voice tools to make sure Inputs, Outputs and Expected Behaviors.
- Functionally tested APIs using Postman to ensure data flows correctly to support Features, Business Logic and User Requirements.
- Regression Testing done on iOS and Android apps to ensure Stability UI/UX & API integration stands up to mark in Agile Development Model.
- Performance and Stress Testing done for high Volume Email and SMS Campaigns.
- Log and track Tickets in Jira with clear reproduction steps & screenshots, shared updates directly with Devs and Leads to collaborate and resolve bugs efficiently.
- Engaged at Requirements gathering and User stories creation stage to catch problems early.

Automated and AI Assisted Testing

- Performed Model based Testing by generating test cases through Component Diagrams, Flow Charts, Sequence Diagrams, User Workflows and Swagger Documentations.
- Wrote Test scripts using Selenium WebDriver to test Web pages, forms, and essential User flows across different browsers.
- Automation done with AppliTools with Selenium to catch UI/UX issues like broken layouts or wrong colors that are hard to spot manually.
- Used AI tools to generate large data sets for Stress and Performance Testing and Set up Auto tests for repeated regression checks.
- Worked with Cold Calling Bots Testing for Telecom and Call Center Application

Software Tester at RecruitBPM

July 2021 to June 2022

Islamabad, Pakistan

Worked on a B2B recruitment software used by large companies.

- Executed Functional, Regression, and Exploratory tests to ensure application Stability.
- Created and maintained manual test cases in TestRail for key user flows and edge cases.
- Worked closely with developers to fix bugs quickly by giving clear steps to reproduce them.

PROJECTS

TalkerCRM AI Voice CRM | SuiteCRM, AI/ML, Voice Integration

- Tested voice activated features that let users talk to SuiteCRM in natural language to create records, update information, and get insights.
- Ensure that data entry automation worked correctly to reduce manual work and keep data accurate.

- Tested built in AI agents that help users with their daily tasks inside the CRM.
- Ensure the overall system was fast and easy to use, working like a personal assistant for CRM users.

Sigla Credit and Bizzotto CRM | *SuiteCRM, Web, API*

- Performed Model based Testing by generating test cases through Component Diagrams, Flow Charts, Sequence Diagrams, User Workflows and Swagger Documentations
- Tested full workflows in a credit management and sales CRM covering screens, data, API replies, and user permissions.
- Kept clients updated on bugs and whether the product was ready to release each sprint.

PoseMate AI Posture Correction App | *Python, CNN, TensorFlow, Mobile*

- Built and tested an AI model using CNN that was 95% accurate on 20,000 images. Cut training time by 30% by improving data preparation.
- Final Year Project. Came Third Place in the NUST Department.

Real Time Chat Application | *ReactJS, WebSocket*

- Built and tested a live chat app using WebSocket. Made sure messages sent fast and the interface worked well.

TECHNICAL SKILLS

Testing: Manual Testing, Functional Testing (Smoke, Sanity, UI, API Integration and End-to-End), Regression Testing, UAT, Exploratory Testing, Mobile Testing, Cross Browser Testing and Model Based Testing

Automation and AI QA: Selenium WebDriver, Applitools, PHPUnit, AI based defect prediction, automated regression testing

Tools: JIRA, Postman, TestRail, Trello, ClickUp, Asana, Slack and Twilio

Languages: JavaScript, Python and C++

Frameworks: ReactJS, PyTorch and TensorFlow

Databases: MySQL and SQL
