Summary

Software QA Engineer and AI Engineer with two years of production experience testing and building systems for AI products, CRM platforms, and fintech workflows. Currently hold dual roles: QA Engineer at SageTeck, owning the release quality gate for AI voice/chat products and financial workflows, and AI Engineer at SkilliHire, building multi-agent systems and RAG pipelines for a live learning platform. Apply adversarial, failure-first thinking from QA directly to AI system design, and use AI engineering to generate the large-scale test data QA work at scale requires.

Experience

AI Engineer

May 2026 – Present

SkilliHire

Remote

- Design and build multi-agent AI systems, RAG pipelines, and vector-search backends for **ngedu.ai**, a live Year 0–12 learning platform, using LangGraph, LangChain, and modern LLMs
- Architect agent flows that resolve failure cases first – empty retrievals, tool timeouts, adversarial prompts – rather than patching them in after launch
- Collaborate with the core engineering team to ship production-grade agent and retrieval layers wired into a live, paid product
- *Stack: Python, LangGraph, LangChain, RAG, Multi-Agent Systems, Vector Search, ReactJS*

Software Quality Assurance Engineer

June 2025 – Present

SageTeck

Islamabad, Pakistan

- Own the release quality gate across AI products (TalkerCRM), a fintech platform (Sigla Credit), and CRM systems (Route Planner, Bizzotto CRM)
- Design exploratory and regression test plans derived from component diagrams, sequence diagrams, Swagger docs, and real user workflows
- Validate REST APIs with Postman and maintain automated regression suites in Selenium WebDriver and Applitools
- Run performance and stress testing for high-volume email/SMS campaigns; log defects in Jira with reproducible steps

Software Quality Assurance Engineer

July 2024 – June 2025

RecruitBPM

Islamabad, Pakistan

- Led manual and regression testing for a B2B recruitment ATS/CRM, keeping it stable for 10,000+ users across web and mobile
- Validated REST APIs and executed functional, regression, and exploratory suites every release
- Maintained test cases in TestRail for key flows and edge cases
- Cut bug-resolution time by tightening Jira/ClickUp workflows and collaborating directly with developers

Projects

AI Engineering Projects

ngedu.ai – AI Learning Platform

May 2026 – Present

Multi-agent and RAG engineer on a live Year 0–12 learning platform; built agent flows and vector-search-backed retrieval that keep generated content anchored to curriculum sources. *LangGraph, LangChain, RAG, Multi-Agent Systems, Vector Search* – ngedu.ai

evidence-rag

July 2026

Solo-built RAG service with hybrid (sparse + dense) retrieval, reranking, and enforced citations, so an ungrounded answer fails visibly instead of sliding through. Runs entirely on free-tier infrastructure. *Python, RAG, Hybrid Retrieval, Reranking, LLMs* – [GitHub](https://github.com)

Cart Copilot

July 2026

Six-agent shopping assistant that parses intent, searches live stores, compares products, and reasons over a cart for savings and mismatches, backed by 141,240 real reviews. *Python, FastAPI, Multi-Agent Systems, LLMs, Supabase, React* – [Live – GitHub](https://github.com)

CareerFit Pro

March 2026

Scores a resume against a job description using semantic embeddings and sentence-transformers, reporting where the two actually line up. *Python, Sentence-Transformers, Semantic Search, NLP* – [GitHub](https://github.com)

PoseMate – AI Posture Correction2024

CNN posture-evaluation model with real-time correction, trained to 95% accuracy on 20,000 images; better data preparation cut training time by 30%. Placed 3rd in the NUST CS department final-year projects. *Python, CNN, TensorFlow, Computer Vision*

– GitHub

QA Engineering Projects

TalkerCRM – AI Voice CRM2025 – Present

QA owner for an AI voice/chat CRM: adversarial dataset generation, model-based test design from system artifacts, and end-to-end validation from spoken intent through to CRM record. *SuiteCRM, Voice AI, LLMs, Postman, Model-Based Testing*

– Live – Dev

Sigla Credit – Financial Workflows2025 – Present

Model-based testing across a live credit platform on SuiteCRM: test derivation from component diagrams and Swagger specs, full-workflow validation across UI, API, and permission boundaries, and a per-sprint release-readiness call. *SuiteCRM, Postman, Swagger, API Testing, Model-Based Testing* – Demo

Bizzotto CRM and Route Planner2025 – Present

Functional and regression testing on a sales CRM built around email/SMS marketing campaigns, including performance and stress testing for high-volume sends. *SuiteCRM, Postman, Performance Testing, Twilio, Jira* – Live

Other Projects

Real-Time Chat Application2024

Built and tested a live chat app over WebSocket, focused on message latency and interface stability under concurrent users. *ReactJS, WebSocket, JavaScript*

Education

B.S. in Computer Science2020 – 2024

National University of Sciences and Technology (NUST)Graduated June 2024

Achievements & Leadership

Outstanding Project Achievement2024

Final Year Project – Third PlaceNUST

- Facilitated code reviews and ensured effective team communication throughout the project lifecycle
- Solved complex technical problems and secured third place in department for the PoseMate project
- Co-authoring a conference paper with project supervisor, "Improved Pose Estimation and Correction Using Trigonometric Ratios" (unpublished, in progress)

Skills

QA Engineering	Manual, Functional, Regression, Exploratory, API/Integration, UAT, Mobile, Cross-Browser, Model-Based, Performance/Stress Testing
QA Process	STLC, Agile Scrum, Test Planning & Case Design, Defect Lifecycle Management, REST API Validation, Production Release Verification
AI Quality	LLM Output Validation, Adversarial & Red-Team Probing, Hallucination & Grounding Checks, Synthetic Test-Data Generation, Non-Deterministic System Evaluation
AI Engineering	LangGraph, LangChain, RAG Pipelines, Multi-Agent Systems, Vector Search, Hybrid Retrieval & Reranking, LLMs, Prompt Engineering
Test Automation	Selenium WebDriver, Applitools, Postman, PHPUnit, TestRail, Swagger/OpenAPI
Languages & Frameworks	Python, JavaScript, C++, ReactJS, TensorFlow, PyTorch, SQL
Platforms & Tools	Jira, ClickUp, Trello, Asana, Git/GitHub, MySQL, SuiteCRM, Twilio, Slack

Certifications

- The AI Engineer Course 2026: Complete AI Engineer Bootcamp – 365 Careers, Udemy (July 2026)
- Machine Learning Specialization – Stanford University & DeepLearning.AI, Coursera (July 2026)
- Supervised Machine Learning: Regression and Classification – Stanford University & DeepLearning.AI, Coursera (July 2026)
- Advanced Learning Algorithms – Stanford University & DeepLearning.AI, Coursera (July 2026)
- Unsupervised Learning, Recommenders, Reinforcement Learning – Stanford University & DeepLearning.AI, Coursera (July 2026)
